

## COUNTERMATE evo

Milling center

HSC technology – milling at maximum output & perfection – accurate and clean high speed processing

- Processes steel, pertinax and wood for stripping boards
- Working area 1700 x 1250 mm (67 x 50")
- Work table with area controlled vacuum system for perfect material fixing
- High performance extraction system for wet and dry milling
- Milling spindle with 4.5 KW and 60,000 rpm
- Adjustable minimum lubrication system
- Automatic tool changer for up to 28 milling tools
- Option **MEASUREMATE** to automatically measure the position of creasing rules on a knifed die board
- State of the art CNC technology with touch screen interface
